EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Claim 1, line 23, after "termination trenches to said" replace "first" with --second--.

Claim 1, line 26, after "portion of said" replace "second" with --first--.

Claim 1, line 29, after "portion of said" replace "second" with --first--.

Cancel claims 8-12.

Allowable Subject Matter

2. Claims 1-7 are allowed.

3. The following is an examiner's statement of reasons for allowance: the prior art of record, either singly or in combination, fails to disclose the limitations of:

first layer of a first conductivity type overlying a second layer of a second conductivity type opposite to said first conductivity type, said die further comprising: an active area comprising an MIS device, said MIS device comprising: an active trench comprising a conductive gate material and extending downward from a surface of said first layer, a bottom of said active trench being located in said first layer;

a source region of said second conductivity type in said first layer, said source region being located adjacent said surface of said die and a sidewall of said active trench; and

a drain-drift region of said second conductivity type extending downward from said bottom of said active trench to said first layer; and
a termination region comprising:

at least a first and a second termination trench, each of said termination trenches extending downward from said surface of said die, each of said termination trenches comprising a conductive material and having a bottom in said first layer, said conductive material in each of said termination trenches being insulated from said first layer by a dielectric layer lining the sidewalls and bottom of said termination trench;

a region of said second conductivity type extending from a bottom of each of said termination trenches to said first layer;

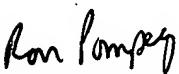

at least a first and a second metal layer above said surface of said die, said first metal layer being electrically connected to said conductive material in said first termination trench and to a portion of said first layer in a mesa between said first and second trenches, said second metal layer being electrically connected to said conductive material in said second termination trench and to a portion of said first layer in a region on a side of said second termination trench opposite from said mesa, wherein said conductive materials in said termination trenches are electrically isolated from each other and from said source region and said first layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ron E. Pompey whose telephone number is (571) 272-1680. The examiner can normally be reached on compressed.
